OPPOSITION OF VERIZON¹

Introduction and Summary

In the instant Public Notice, the Commission invites parties to comment on supplemented petitions by various wireless carriers seeking to be designated as eligible telecommunications carriers (“ETCs”) pursuant to 47 U.S.C. § 214(e)(6). *See* Public Notice, DA 04-998 (rel. Apr. 12, 2004). As the petitions pending before the Commission show, granting additional ETC designations and redefining additional service areas before the Commission has revised the existing portability rules would dramatically increase the size of the universal service fund. The petitions at issue just in the recent Commission orders and the pending public notices could amount to approximately \$376 million per year in additional high cost funding in rural areas, and \$112 million in non-rural funding, which would dilute CALLS support to other carriers. The Commission should refrain from acting on any pending ETC petitions until the outcome of the pending portability rulemaking proceeding has been resolved. In addition, it should deny the

¹ The Verizon telephone companies (“Verizon”) are the local exchange carriers affiliated with Verizon Communications Inc., and are listed in Attachment A.

petition of any carrier that has not addressed the public interest standard for non-rural areas or the creamskimming concerns for rural areas that were raised in the *Highland Cellular Order*.²

Argument

I. The Cost To The Universal Service Fund Would Be Dramatic If The Pending ETC Petitions, And Others Like Them, Are Granted.

Many carriers petitioning for ETC status assert that grant of their individual ETC petitions “will not significantly affect the size of the Universal Service Fund’s High Cost program.” Nextel Partners, *Supplement to Petition for ETC Designation in the State of Pennsylvania*, CC Docket No. 96-45, at 9 (filed Mar. 24, 2004). However, none discusses the cumulative effect that would occur to the fund if the FCC and various state commissions were to grant all pending and future ETC petitions. In fact, if competitive ETCs were to get funding for additional lines throughout the study areas where they are seeking to be designated, just the petitions at issue in the pending ETC public notices and the recently granted Virginia Cellular and Highland Cellular ETC designation orders could increase the size of the rural universal service high fund costs by approximately \$376 million per year. *See High-Cost Fund Amounts Involved In Pending Petitions For ETC Designation And Redefinition Of Service Areas Covered By DA 04-998 And DA 04-999 (included as Attachment B); High-Cost Fund Amounts Involved In Virginia Cellular And Highland Cellular Orders (included as Attachment C)*.³ In addition, they

² *Highland Cellular, Inc., Petition for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia*, CC Docket No. 96-45, FCC 04-37, ¶¶ 26-27 (rel. Apr. 12, 2004).

³ These estimates include petitioners in the instant proceeding, as well as petitioners for ETC status whose supplemental responses are due by May 14. *See Public Notice, DA 04-999 (rel. April 12, 2004)*. The Commission estimated that, if Virginia Cellular were to

would capture up to \$112 million in non-rural, CALLS-based high cost support. *See* Attachment B. As CALLS support is capped at \$650 million per year, this would further dilute the amounts available to the fund's intended use (replacing interstate access support), and threatens to unravel the access charge reform established by the CALLS Order.⁴

Moreover, the pending ETC petitions appear to be just the tip of the iceberg. Many of the petitioners here appear to be undertaking a strategy to seek high-cost support in *all* states in which they operate. *See* Attachment B. Indeed, many states have two or more wireless carriers seeking high cost support for the same state. *See* Attachments B, C. For example, in Virginia, at least six separate wireless companies either are seeking or already have sought ETC status.⁵ And to the extent that wireless companies begin to

capture "each and every customer located in the" rural study areas for which it was seeking ETC status, the grant of the Virginia Cellular petition could result in an increase of up to approximately \$900,000 per quarter, or nearly \$3.6 million per year. *See Federal-State Joint Board on Universal Service; Virginia Cellular, LLC Petition for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia*, 19 FCC Rcd 1563, ¶ 31 n.96 (2004) ("*Virginia Cellular Order*"). Using a similar analysis for the Highland Cellular petition resulted in an estimated potential increase of up to \$360,000 per quarter, or over \$1.4 million per year. *See Highland Cellular Order*, ¶ 25 n.73. Verizon has used the same assumptions as the Commission in calculating the amount of support potentially at issue in Attachments B and C. Although some of the petitioners have calculated that their individual petitions would only provide support to a portion of the lines in these study areas, it is not unreasonable to assume that, if the current trends continue without any change to the rules regarding portability of support, the high cost fund could end up subsidizing one wireline and one wireless line per customer, which is what the estimates roughly approximate.

⁴ *See Access Charge Reform, Price Cap Performance Review for Local Exchange Carriers, Low-Volume Long Distance Users, Federal-State Joint Board on Universal Service*, 15 FCC Rcd 12962 (2000) ("*CALLS Order*"), *aff'd in part, rev'd and remanded in part sub nom. Texas Office of Public Utility Counsel v. FCC*, 265 F.3d 313 (5th Cir. 2001).

⁵ *See Alltel Communications, Inc., Application for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia*, CC Docket No. 96-45

consider high-cost funding as part of their business plan for competing in rural and high cost areas, they put pressure on other wireless carriers to seek the same funding, in order to remain competitive. Thus, it is conservative to estimate that, without any changes to the Commission's portability rules, if the Commission were to grant all of the pending ETC petitions, and state commissions were to grant the ETC petitions pending before them, the cumulative impact will easily total hundreds of millions of dollars per year in additional high cost support. This is on top of the already "dramatic" recent increase in ETC funding commitments already noted by the Commission.⁶

The Commission has before it a pending Joint Board Recommended Decision in the high cost portability proceeding. *See Federal-State Joint Board on Universal Service*, 19 FCC Rcd 4257 (2004). As commenters in that proceeding (including Verizon) have noted, the Commission should change the portability rules so that consumers are not subsidizing redundant networks in places where it is not efficient for even one to operate without universal service support, and so that CALLS support is not diluted from its intended purpose. *Comments of Verizon*, CC Docket No. 96-45, at 4-7 (filed May 5,

(filed Apr. 14, 2003); NCPR, Inc. d/b/a Nextel Partners, *Petition for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia*, CC Docket No. 96-45 (filed Apr. 23, 2003); Sprint Corporation, *Application for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia*, CC Docket No. 96-45 (filed Aug. 29, 2003); Virginia PCS Alliance, L.C. and Richmond 20 MHz, LLC (D.B.A. NTELOS), *Application for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia*, CC Docket No. 96-45 (filed Nov. 10, 2003); *see generally Virginia Cellular Order*; *Highland Cellular Order*.

⁶ *See Highland Cellular Order*, ¶ 25 (noting that, in the first quarter of 2001, three competitive ETCs received approximately \$2 million in high cost support; by fourth quarter 2003, it had grown to 112 competitive ETCs receiving \$32 million per quarter); *see also* Federal Universal Service Support Mechanisms Fund Size Projections for the First Quarter of 2004, Appendix HC1 (Universal Service Administrative Company) (estimating that 121 competitive ETCs would receive approximately \$41 million during the first quarter of 2004).

2003). The Commission should refrain from granting any future ETC petitions until that proceeding has been resolved.

II. Petitioners Must Demonstrate That ETC Designations In Non-Rural Areas Would Be In The Public Interest.

Even following the clear direction of the *Virginia Cellular Order*, some ETCs have claimed that an ETC applicant in a non-rural area may obtain ETC status without *any* demonstration that a grant of its application is “consistent with the public interest, convenience, and necessity.”⁷ Because this reading of Sections 214(e)(2) and (6) conflicts with the plain language of the statute and causes absurd results, the Commission should reject it. It also should reject any pending petition for ETC status in non-rural areas that fails to analyze whether such designation would satisfy the public interest standard set forth in the *Virginia Cellular Order*.

Section 214(e)(6) provides in pertinent part that:

Upon request and consistent with the public interest, convenience and necessity, the Commission may, with respect to an area served by a rural telephone company, and shall, in the case of all other areas, designate more than one common carrier as an eligible telecommunications carrier for a service area designated under this paragraph, so long as each additional requesting carrier meets the requirements of paragraph 1.

⁷ See Sprint Corporation, *Petition for Reconsideration*, CC Docket No. 96-45 (filed Feb. 23, 2004) (“*Sprint Petition for Reconsideration*”); see also Letter from Glenn S. Rabin, Alltel, to Marlene Dortch, FCC, CC Docket No. 96-45, at 6 (filed Mar. 1, 2004) (stating that “the public interest factors delineated in the Virginia Cellular Order, other than the service commitments, apply exclusively to the public interest analysis for rural service areas and not to the non-rural service areas that are the subject of this supplement”).

47 U.S.C. § 214(e)(6).⁸ In the *Virginia Cellular Order*, the Commission correctly interpreted this provision to require an ETC applicant in a non-rural area to demonstrate that a grant of its application is “consistent with the public interest, convenience, and necessity.” *Virginia Cellular Order*, ¶ 26. The Commission also properly found that an applicant’s burden extends beyond making a simple showing that the designation of an additional ETC carrier in a non-rural area complies with Section 214(e)(1). *Id.* ¶ 27.

The “statutory language at issue, as well as the language and design of the statute as a whole” compelled the Commission’s determinations. *K Mart Corp. v. Cartier, Inc.*, 486 U.S. 281, 291 (1988). Indeed, as the D.C. Circuit has held, “[a]ny party attempting to demonstrate that the introductory wording of a section in a statute should be deemed inapplicable to one of its subsections . . . clearly must carry a heavy burden of persuasion.” *Gen. Svc. Employees Union Local No. 73 v. Nat’l Labor Relations Bd.*, 578 F.2d 361, 367 (D.C. Cir. 1978). In light of the statute’s plain language, it is *impossible* to logically read the requirement that an application be “consistent with the public interest, convenience, and necessity” as applying only to applications for ETC status in rural areas. Contrary to the contention of some ETC petitioners, the only reasonable interpretation of this introductory phrase is that it applies to the rest of the sentence that follows it. *See id.*; *see also Citizens to Save Spencer C’ty v. EPA*, 600 F.2d 844, 861 (1979) (rejecting argument that “‘introductory’ phrase” was a “‘scrap of general language’” and concluding, instead, that it applied to the statutory terms that followed it).

The opening clause of Section 214(e)(6) applies, as a simple grammatical matter, to the entirety of the text that ensues. The sentence that constitutes that subsection

⁸ Section 214(e)(2) contains identical language, except that it refers to (and applies to) decisions by State Commissions, rather than the FCC, regarding ETC applications.

begins: “Upon request and consistent with the public interest, convenience, and necessity, ...”. This is a conditional clause that, as the placement of the comma at the end makes perfectly clear, qualifies the Commission’s authority in adjudicating both rural and non-rural applications for ETC status.⁹ In both cases, a party must have filed a request *and* the ultimate grant must comport with the public interest.

Sprint has nevertheless filed a petition for reconsideration of that portion of the *Virginia Cellular Order*, seeking to avoid the import of the statute’s basic language and structure by focusing upon the juxtaposition of Congress’ use of the term “may” with respect to rural areas and its use of the term “shall” with respect to non-rural areas. *Sprint Petition for Reconsideration*, at 3-4. The fact that the Commission “may” designate an ETC that meets the statutory criteria for designation in rural areas while it “shall” do so in non-rural areas simply means that the Commission has more discretion in the context of designating ETCs in one context than in the other.¹⁰ In rural areas, the Commission has discretion to deny an ETC application even if a grant of the application would be “consistent with the public interest, convenience and necessity.” 47 U.S.C. § 214(e)(6); *see id.* § 214(e)(2). In non-rural areas, by contrast, once the Commission determines that granting an ETC application meets the public interest test, it has no discretion at all and must grant the application. Despite Sprint’s protestations to the

⁹ *E.g., Anhydrides & Chemicals, Inc. v. United States*, 130 F.3d 1481, 1483 (Fed. Cir. 1997) (stating that “rules of grammar apply in statutory construction”); *Ginsburg, Feldman & Bress v. Federal Energy Admin.*, 591 F.2d 717, 741 (D.C. Cir. 1978) (rejecting interpretation of statute that was “violative of basic rules of English grammar”).

¹⁰ *Lopez v. Davis*, 531 U.S. 230, 241 (2001) (the use of “may” vests an agency with broad discretion, while the use of “shall” elsewhere in the same statute imposes “discretionless obligations”); *see Appalachian Power Co. v. EPA*, 135 F.3d 791, 807 (D.C. Cir. 1998).

contrary, this difference in the level of the Commission's discretion says nothing about whether a public interest showing is required in the context of non-rural areas. And it certainly cannot undo the fact that the opening clause of Section 214(e)(6) by its language and structure extends to the whole subsection.

Not only is Sprint's proffered interpretation inconsistent with the statutory language, but it also would lead to entirely absurd results. If an application for ETC designation in a non-rural area need not be "consistent with the public interest, convenience, and necessity" because that phrase does not apply to the entirety of the remaining sentence, then no application is required at all. This is because the requirement that ETC designation in a non-rural area be made based on an application is embodied in the statute's "[u]pon request" language, contained in the same clause as the public interest requirement and connected to that requirement with the term "and." If the "consistent with the public interest, convenience and necessity" language does not apply to all that follows it, then neither does the "[u]pon request" language. Sprint offers no explanation as to how ETC status would be obtained in non-rural areas if not "[u]pon request" and, indeed, no such explanation exists. Because Sprint's interpretation would lead to an absurd situation in which no application would be required for non-rural areas, it must be rejected.¹¹

Because the language of the statute is plain and Sprint's proffered interpretation is entirely illogical, there is no need to resort to the legislative history as Sprint would have

¹¹ *Griffin v. Oceanic Contractors, Inc.*, 458 U.S. 564, 575 (1982) ("[I]nterpretations of a statute which would produce absurd results are to be avoided if alternative interpretations consistent with the legislative purpose are available."); *FTC v. Ken Roberts Co.*, 276 F.3d 583, 590 (D.C. Cir. 2001) (rejecting interpretation of statute because it "produces potentially absurd results").

the Commission do.¹² Even if an examination of the legislative history were appropriate, however, it does not support Sprint’s reading of the statute. The portion of the legislative history upon which Sprint relies fails to make plain that an ETC application may not be granted unless it is consistent with the public interest.¹³ But it is well established that the absence of language in the legislative history cannot be used to override the express terms of the statute.¹⁴ Accordingly, Sprint has failed to provide any basis for the FCC to disturb its finding in the *Virginia Cellular Order* that ETC applicants in non-rural areas must demonstrate that a grant of ETC status will be “consistent with the public interest, convenience and necessity.”

Moreover, the Commission should reject those claims that it has not provided applicants with sufficient guidance regarding the content of the “public interest” test that it will apply to applications for ETC status in non-rural areas. *See Sprint Petition for Reconsideration*, at 4. In the *Virginia Cellular Order*, the Commission stated that the applicant’s satisfaction of the public interest test that applies to rural areas was more than sufficient to demonstrate compliance with the public interest test applicable to non-rural areas because the former is “more rigorous.” *Virginia Cellular Order*, ¶ 27. This makes

¹² *Sprint Petition for Reconsideration*, at 3 & n.4; *see, e.g., HUD v. Rucker*, 535 U.S. 125, 132 (2002) (stating that “reference to legislative history is inappropriate when the text of the statute is unambiguous”); *AT&T Corp. v. FCC*, 323 F.3d 1081, 1083 (D.C. Cir. 2003) (stating that “where the statute’s text is clear, we have no need to resort to [the] legislative history”)

¹³ *See Sprint Petition for Reconsideration*, at 3 n.4 (quoting *1996 Act Conference Report* at 141).

¹⁴ *See, e.g., Ratzlaf v. United States*, 510 U.S. 135, 147-48 (1994). In addition, the second sentence of the legislative history quoted by Sprint does not even apply to the provision at issue here. That sentence refers to the last sentence of Section 214(e)(6), which governs rural areas only.

clear that in non-rural areas, the same factors as apply in rural areas are relevant, but that a carrier need not make as strong a showing to obtain ETC status in non-rural areas.

Those factors are: (1) the benefits of increased competitive choice; (2) the impact of designation on the universal service fund; (3) the unique advantages of the competitor's service offering; (4) any commitments made regarding quality of telephone service; and (5) the competitive ETC's ability to satisfy its obligation to serve the designated service areas within a reasonable time frame. *Id.* ¶ 28. Unless and until a different standard is announced in the Joint Board portability proceeding, petitioners seeking ETC status in non-rural areas must address the same factors that are at issue in a rural public interest analysis.¹⁵ Although some factors may be more at issue in rural than non-rural areas (or vice versa), and thus the balancing of those factors may not always be the same, the same analysis and set of factors should be considered in both rural and non-rural areas.

III. Rural Cream-Skimming Concerns Must Be Addressed.

Many of the petitioners addressed by this public notice are seeking to serve only their existing service territory, in areas where they are seeking rural, high-cost support.¹⁶ To the extent they have not already done so, those petitioners should be required to supplement the record to address the Commission's statements in the *Highland Cellular*

¹⁵ The Commission has noted that the outcome of the Joint Board portability proceeding could impact the Commission's public interest analysis for future ETC designations in both rural and non-rural areas. *See Virginia Cellular Order*, ¶¶ 27, 28. Accordingly, the test announced in the *Virginia Cellular Order* is an interim standard only, and proceedings stemming from the *Portability Public Notice* will ultimately resolve the precise public interest that will apply in rural and non-rural areas.

¹⁶ *See, e.g.,* NPCR, Inc. d/b/a Nextel Partners, *Petition for Designation as an Eligible Telecommunications Carrier in the State of New York*, CC Docket No. 96-45 (filed Apr. 3, 2003); Guam Cellular and Paging, Inc. d/b/a Saipancell, *Petition for Designation as an Eligible Telecommunications Carrier on the Island of Saipan*, CC Docket No. 96-45 (filed Feb. 19, 2002).

Order concerning creamskimming.¹⁷ Specifically, the Commission noted that even if there is no evidence that a wireless carrier is deliberately seeking to serve only the lowest cost customers in a high-cost area, “we recognize that, for reasons beyond a competitive carrier’s control, the lowest cost portion of a rural study area may be the only portion of the study area that a wireless carrier is licensed to serve. Under these circumstances, granting a carrier ETC designation only for its licensed portion of the rural study area may have the same effect on the ILEC as rural creamskimming.” *Highland Cellular Order*, ¶ 27.

If carriers are seeking to serve only a portion of a rural high-cost areas, they should provide an analysis of the creamskimming concerns raised in the *Highland Cellular Order*. At a minimum, that would include identifying which portion of the rural wire centers they propose to serve, population density information regarding the areas they are proposing to serve versus the areas they would not serve, and any other factors (such as terrain, or loop links), that would affect the analysis of whether they are serving only the lowest cost areas, and thus determine whether the effect of allowing them to serve less than the full portion of the study area would result in creamskimming.

¹⁷ Creamskimming in this context refers to the practice of targeting only the customers that are the least expensive to serve, thereby undercutting the ILEC’s ability to provide service throughout the area. *See Virginia Cellular Order*, ¶ 32 n.102.

Conclusion

The Commission should refrain from deciding any pending ETC petitions until it resolves the issues raised in the Joint Board portability proceeding.

<u>Carrier</u>	<u>State</u>	<u>SAC</u>	<u>Study Area Name</u>	<u>Rural/Non-Rural</u>	<u>Total High Cost Quarterly Amount (Rural)</u>	<u>Total High Cost Annual Amount (Rural)</u>	<u>Total High Cost Quarterly Amount (Non-Rural)</u>	<u>Total High Cost Annual Amount (Non-Rural)</u>
	TOTAL (Rural/Non-Rural Areas)				\$93,880,119	\$375,520,476	\$27,891,003	\$111,564,012
	TOTAL (All Areas)							\$487,084,488
Consolidated Notes:								
Unless otherwise noted, all data was obtained from Federal Universal Service Support Mechanisms Fund Size Projections for the First Quarter of 2004, Appendix HC1 (Universal Service Administrative Company).								
[1] The petitioner does not list specific SAC identification numbers, but does list company names. The Study Area Names listed herein are therefore based upon company name correlation. Where the Study Area Name and company name contained in the petition differed in any significant respect, the company name included in the petition is referenced in parenthesis.								
[2] Value is indicated as zero to avoid double-counting areas in which more than one carrier has applied for ETC status.								
[3] ETC status is sought as to specific wire centers (or portions of Study Areas) only. For purposes of calculating the total high-cost amounts, the value for the entire Study Area was used. This is consistent with the approach taken by the Commission in the Virginia Cellular Order. See FCC 03-338, para. 31 n.96.								
[4] The company name listed in the petition does not correlate with any Study Area Name of the relevant type (rural or non-rural) for the relevant state that is contained in any available Fund Size Projection.								
[5] Data was obtained from Federal Universal Service Support Mechanisms Fund Size Projections for the First Quarter of 2003, Appendix HC 1 (Universal Service Administrative Company) because these Study Areas are not included in more recent documents.								
[6] Data was obtained from Federal Universal Service Support Mechanisms Fund Size Projections for the Fourth Quarter of 2002, Appendix HC 1 (Universal Service Administrative Company) because these Study Areas are not included in more recent documents.								
Note also that Alltel Communications, Inc. has sought ETC status in both rural and non-rural areas in Alabama, Virginia, Georgia, North Carolina, and Florida. Alltel previously bifurcated its pending ETC petitions into separate requests for ETC designation in non-rural and rural service areas. Alltel's requests for ETC status in rural and non-rural areas are the subject of different public notices. See <i>Public Notice</i> , DA 04-998 (rel. Apr. 12, 2004) (non-rural areas) ; <i>Public Notice</i> , DA 04-999 (rel. Apr. 12, 2004) (rural areas).
